

Crate stacker for the Seafood Industry - As new - Fully overhauled

type: LETS overhaul

LETS Crate Stacker for the Seafood Industry - As new - Fully Overhauled

- Reduction in personnel costs
- Hygienic Design
- Prevents cross-contamination
- Allows for a union approved, responsible operation

A Crate Stacker specifically designed for the Seafood Industry, for the stacking of fish crates.

The crates are stacked and nested from below.

Due to the simplicity of the unit, it is very reliable and suitable for industrial use.

Unit has a capacity of 600 crates per hour with a maximum stacking height of 2 meters.

Crates that adhere to the following measurements are suitable for use in the machine: 800x450 mm.

It is possible to modify the machine to fit crates with a deviating measurement.
